

# **SDL-2 EASY LATCH BACK**

For Trailer Doors  
With All New Stainless Steel Latch bar

*SDL 2 Easy Latch Back 9/16" Stainless Steel*

## **Safety Door Holdback System**

*Works well on all trailers*

Pat. Pending

### **Easy Latch Back**

Safety device designed to secure hinged doors in an OPEN position substantially eliminating dangerous and costly on the job accidents, and helping prevent the loss of doors.

Mounts under side of trailer

### **Easy To Install**

Drill four, 5/16" holes in I-beam/floor supports approximately 36" from the end of the trailer. Make sure that the unit is under the side of the trailer and the 9/16" latch bar is flush with the side of the trailer.

### **Easy To Maintain**

9/16" Stainless steel latch bar and a plated body to resist corrosion, steel fastener and end plug with grease fitting for long lasting effortless use.

### **Easy To Use**

Secures all types of hinged trailer doors. Just pull it out and place against the open door or place over bottom of lock bar. It will hold the door against the side of the trailer and allow the driver to see the back of the trailer

Must use light weight grease on all units.  
We can modify the end of rod to hook the lock rod
