

SDL-3 EASY LATCH BACK

For Trailer Doors

Pat. Pending

Easy Latch Back

Safety latching device designed to secure hinged doors in an open position substantially eliminating dangerous and costly on the job accidents, and helping prevent the loss of doors. Replaces existing chain hold back system.

Easy To Install

Drill two 1/4" holes and mount to the side rail approximately 36" from the back of the trailer. Use with existing chain assembly or an optional chain can be provided upon request.
(Instructions & template are included on how to install.)

Easy To Maintain

The SDL-3 requires virtually no maintenance. Stainless steel construction resists corrosion.

Easy To Use

Just lift the 1/4" stainless steel wire latch, insert the chain end, and let the wire fall back into place to secure door against the side of the trailer. To release, just lift the latch and remove the chain.

Drivers will use this system!
